

DWARF DC BRAND BMR

Profile

Many farmers are reviewing their choices for perennial and annual crops after recent droughts. Due to the species' great stress tolerance to abiotic factors, sorghum is receiving more attention in this context. DWARF DC Brand BMR is an early hybrid with 40% more leaf density due to the leaf count and leaf width. The results are a digestible high-quality forage.

- ✓ Highly palatable
- ✓ Drought tolerant
- ✓ High yield
- ✓ Lower input cost to corn
