

ROBUST

High Yield, Low Dormancy

Alfalfa

Profile

This is a synthetic variety that has been selected from multiple high performing parent plants in Wisconsin. Robust’s special breeding allows for the winterhardiness of a fall dormancy 2, while maintaining the growth, yield and feed values typical of higher dormancy alfalfas. This makes Robust the ideal performer in Western Canada.

- ✓ Multifoliate with high leaf stem ratio
- ✓ High forage dry matter yield and RFV
- ✓ Vigorous roots
- ✓ Dense crowns

Resistance to diseases

Bacterial Wilt	<div><div>+</div><div>+</div><div>+</div></div>
Fusarium wilt	<div><div>+</div><div>+</div><div>+</div></div>
Anthracnose	<div><div>+</div><div>+</div><div>+</div></div>
