Quick Overview

- StandFast fast growth trait
- Maximize the number of productive cuts each year
- Dark green leaves, moderate MF expression
- Selected for high forage dry matter, high NDFD
- Tall growth habit

Adaptation

Perfection is a high yielding alfalfa featuring the unique StandFast® Fast Growth trait that offers up to 30% faster growth than other competitive alfalfa varieties, resulting in extra cuttings and more harvestable yield each season.

- Breaks dormancy early for a great start to the season. Perfection can produce an extra four to six inches of growth in the first 21 days and reach harvest maturity three to five days ahead of other alfalfas.
- Fast recovery after cutting maximizes the total number of productive harvests each season. Ideal for 3 or 4 cut harvest systems.
- Quick canopy closure naturally suppresses weed competition and conserves soil moisture for crop growth.
- Exceptional persistence allows Perfection to withstand wheel traffic abuse from multiple harvest operations.

Features

SF	STANDFAST
WINTER SURVIVAL INDEX	2.1
FALL DORMANCY	4
ANTHRACNOSE (race 1)	HR
BACTERIAL WILT	HR
FUSARIUM WILT	HR
PHYTOPHTHORA ROOT ROT	HR
APHANOMYCES (race 1)	R
VERTICILLIUM WILT	R
